This institution was established in the year 2011. Our primary purpose is to provide value-oriented education to our students and develop their personalities to become mentally mature, constructive, disciplined individuals with high ideals of national integrity, social commitment, and secularism. We aim to make our students knowledgeable, polite, conscientious, physically and psychologically healthy, practically efficient. The institute takes measures to make them self-motivated, morally robust, well-adjusted, and well-integrated to execute their duty in the best way and be acceptable members of society. We encourage the students to explore the professional path that matches their interests and motivates them to become the best version of themselves. To prepare them for their future, we teach them to gain knowledge and become independent.

The majority of students come from rural backgrounds and are members of marginalized groups. Their primary occupation is farming, which they share with their family. To encourage learning among them, we use a variety of instructional methods. To enhance the learning process, student-centered strategies such as experiential learning, participatory learning, and problem-solving procedures are applied. This strategy helps convey subject knowledge to students effectively. Many faculty members include ICT and PowerPoint presentations in their classroom teaching. We provide digital materials to students for reference purposes.

Students participate in various extracurricular activities provided by the institution, such as tree planting and the Swachh Bharat Abhiyan, which educates students about being responsible citizens.

Competitive quizzes are held for graduating students to prepare them for entrance exams in various areas. Additionally, eminent speakers are asked to deliver lectures on multiple topics.

The College continues to expand its infrastructure. Our goal is to establish ourselves as one of the most excellent colleges in this rural area. The College's mission is to empower students' potential and prepare them to become responsible citizens, and we accomplish this by delivering a high-quality education to our students. As a result, we equip them to be self-sufficient to cope with society's present and future demands and uplift the nation by encouraging the youth.

Instilling the virtues of ethical conduct, self-confidence, and high ideals in students enables them to achieve a meaningful place in society. Education devoid of values is akin to a flower devoid of smell. We strive to mold their futures via the complete development of the student's personality.
